## SUMMARY

Computer science graduate with hands-on industry experience at Nagad, one of Bangladesh's leading fintech companies, where I contributed to mission-critical government integration projects involving high-stakes stakeholder management, requirements gathering, and solution design. I build data-driven systems, from predictive models to automated pipelines, with a strong foundation in analytical thinking, database engineering, and business intelligence, and a keen interest in user behavior and product growth. As a DataCamp-certified data analyst and data engineer, I oversaw the Malala Fund-backed SISGCA initiative, mentoring 600+ students across coastal Bangladesh, and coordinate the Bangladesh Artificial Intelligence Olympiad, which engages 10,000+ students. I thrive at the intersection of technical problem-solving and real-world impact.

## EDUCATION

### B.Sc. in Computer Science and Engineering

Daffodil International University

CGPA 3.58/4

Jan 2020 - Jan 2024

Dhaka, Bangladesh

### Higher Secondary Certification, Science

N.S Govt. College

CGPA 4.42/5

Aug 2018

Natore, Bangladesh

## SKILLS

- **Product & Growth:** Requirements Gathering, Stakeholder Alignment, Technical Documentation, Community Building,
- **Languages & Query:** Python, SQL (PostgreSQL, MySQL, Snowflake, PL/SQL), JavaScript, Bash
- **Data Analysis:** Pandas, NumPy, Matplotlib, Seaborn, Excel, Power BI, Jupyter Notebook
- **Data Engineering:** Apache Airflow, FastAPI, ETL Pipelines, Docker, Databricks, Google Cloud Console, PySpark
- **ML & AI:** Scikit-learn, TensorFlow, LSTM, Regression, Classification, Google Gemini API
- **Databases & Warehousing:** PostgreSQL, MySQL, Snowflake, Google Colab, Kaggle
- **Tools & Platforms:** GitHub, Postman, VS Code, PyCharm, IntelliJ IDEA, WordPress
- **Soft Skills:** Stakeholder Management, Project Management, Analytical Thinking, Mentorship

## WORK EXPERIENCE

### External Party Solution Intern (N-Risers), Nagad

Nov 2025 - Mar 2026

- Orchestrated the end-to-end lifecycle of government integrations, from stakeholder engagement and requirements gathering to deployment, ensuring clear scope, feasibility, and timelines.
- Served as the central bridge between government entities and internal teams, leading project kickoffs, stakeholder alignment, technical feasibility assessments, and solution design.
- Managed mission-critical government relationships and secured beneficiary data, collaborating with R&D on prototypes and innovative integration approaches while ensuring organizational security and capability alignment

### Program Executive , Bangladesh Open Source Network (BdOSN)

Apr 2024 - May 2025

- Oversaw planning and end-to-end execution of SISGCA (STEM & ICT Skills for the Girls of Coastal Area), a two-year international project funded by the Malala Fund and implemented by BFF in partnership with Bangladesh Open Source Network (BdOSN).
- Managed project resource allocation and logistics, ensuring 100% of training hubs were equipped with smart devices and learning materials on time and within budget, in line with Malala Fund's mandate to expand girls' access to technology and ICT career pathways.

## CERTIFICATION

- |                                                                           |            |
|---------------------------------------------------------------------------|------------|
| • <a href="#"><u>Data Analyst Associate Certification</u></a> — DataCamp  | April 2026 |
| • <a href="#"><u>Data Engineer Associate Certification</u></a> — DataCamp | May 2026   |
| • <a href="#"><u>Associate Data Engineer in Databricks</u></a> – Datacamp | July 2026  |
| • <a href="#"><u>Data Scientist in Python</u></a> —DataCamp               | July 2025  |
| • <a href="#"><u>Machine Learning Fundamentals</u></a> — DataCamp         | June 2025  |
| • <a href="#"><u>Introduction to Power BI</u></a> —DataCamp               | March 2025 |
| • <a href="#"><u>Technical Support Fundamentals</u></a> —Google           | June 2020  |

## PROJECTS

- **Nagad Virtual Assistant (Beta)**  
A secure, bilingual AI-powered chatbot for Nagad customer support, built with FastAPI and Google Gemini 2.5 for context-aware responses in English and Bangla.
- **Ops Case Study: Identifying and Investigating Missing Encounters**  
A healthcare data analysis project identifying missing patient encounters between an EHR system and Normandy imports, investigating causes, and improving data integrity.
- **Enterprise Sales Data Warehouse—from raw CRM/ERP files to a business-ready Data Warehouse**  
Designed and implemented a full-scale data engineering pipeline following the Medallion Architecture, turning messy transactional data from CRM and ERP systems into clean, analytics-ready insights.
- **ETL Pipeline with Apache Airflow for Weather Data**  
Built an Apache Airflow ETL pipeline to fetch daily weather data from the Open-Meteo API, transform it, and store it in PostgreSQL

## RESEARCH AND PUBLICATIONS

- [Identifying Potential Malicious and Vulnerable Websites using Machine Learning and Deep Learning](#)

## LEADERSHIP EXPERIENCE

### Coordinator, Bangladesh Artificial Intelligence Olympiad (BdAIO)

February 2025 – Present

- Train participants and collaborate with professors to develop problem sets for the competitions.
- Lead the end-to-end planning and execution of the BdAIO, including regional and national rounds, engaging 10,000+ students.
- Orchestrated and delivered successful competition events, managing all operational aspects from scheduling to technical execution.

### Co-Coordinator, Bangladesh Junior Science Olympiad

August 2023 – Present

- Designed and launched national and regional Junior Science events, a key initiative that developed critical problem-solving skills for students.

## EXTRACURRICULAR ACTIVITIES

### Academic Mentor, Scratch Bangladesh

May 2023 - Present

- Orchestrated 10 Scratch programming workshops for young learners, fostering computational thinking skills, and cultivated a 30% surge in student participation in the regional Scratch Olympiad competition

### Programming and Robotics Mentor, STEM and ICT Education for the Girls of Coastal Area (SIGCA) — Funded by Malala Fund

Aug 2023 – April 2025

- Developed and adapted specialized STEM and ICT curricula (Programming, Robotics, Cybersecurity) to be highly relevant for secondary school girls in coastal communities
